

ORLEN Group Company Overview

August 2026

Disclaimer

This presentation (the “**Presentation**”) contains financial information (the “**Financial Information**”), operational, legal and other information concerning Orlen S.A. (the “**Company**”) and its business.

This Presentation is for information purposes only and does not constitute a prospectus or offering circular or an offer or solicitation to acquire or invest in or take any action in respect of any securities.

The Company does not make any representation or warranty of any sort as to the accuracy or completeness of the information contained in this Presentation or in any other model or information made available in connection with this Presentation or the reasonableness of the assumptions on which any such information is based. No person shall have any right of action against the Company, its directors, officers, employees, advisers or any other person in relation to the accuracy or completeness of any such information. The information contained in this Presentation is subject to amendment and/or completion without notice and such amendments may be material.

This Presentation and any related oral presentations are for information and convenient reference only and do not constitute or form part of an offer or invitation to sell or a solicitation of an offer to buy or to subscribe for or otherwise acquire any securities in any jurisdiction or an inducement to engage in investment activity. There shall be no offers or sales of securities in any jurisdiction in which such offer or sale would be unlawful prior to registration or qualification under the securities law of such jurisdiction. Any securities offered by the Company or any of its subsidiaries will not be registered under the United States Securities Act of 1933, as amended (the “**Securities Act**”) and may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from registration. This Presentation or any part thereof is not for general publication, release or distribution in the United States. Any failure to comply with these restrictions may constitute a violation of law. There will be no public offering of securities in the United States.

This Presentation is confidential and is being submitted to selected recipients only and has not been prepared with a view to public disclosure under applicable securities laws or otherwise. It may not be reproduced (in whole or in part), distributed or transmitted to any other person without the prior written consent of the Company. No person shall be treated as a client of the Company or be entitled to the protections afforded to such clients, solely by virtue of having received this Presentation. These materials are not intended for distribution to or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation or which would require any registration or licensing within such jurisdiction.

The information contained in this Presentation may include results of analyses from a quantitative model that may represent potential future events that may or may not be realized and is not a complete analysis of every material fact relating to the Companies or its business.

This Presentation contains projections and forward-looking statements. The words “believe”, “expect”, “could”, “may”, “anticipate”, “intend” and “plan” and similar expressions identify forward-looking statements. All statements other than statements of historical facts included in the Presentation, including, without limitation, those regarding the Financial Information, the Company’s financial position, potential business strategy, potential plans and potential objectives, are forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the Company’s actual results, performance, achievements and value to be materially different from any future results, performance, achievements or values expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company’s present and future business strategies and the environment in which the Company’s will operate in the future. No warranty or representation is given by the Company or any of its advisers as to the reasonableness of these assumptions. Further, certain forward-looking statements are based upon assumptions of future events that may not prove to be accurate. The forward-looking statements in the Financial Information speak only as at the date of the Financial Information and the Company assume no obligation to update or provide any additional information in relation to such forward-looking statements. Nothing in the Financial Information is, or should be construed as, a profit forecast.

Neither the Company nor any of its affiliates, advisers or representatives shall have any liability whatsoever for any loss whatsoever arising from any use of this presentation or its contents, or otherwise arising in connection with this presentation (whether direct, indirect, consequential or other). To the extent available, the industry, market and competitive position data contained in this Presentation come from official or third-party sources or commissioned industry reports. Such publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. While the Company believes that each of these publications, studies and surveys has been prepared by a reputable source, the Company has not independently verified the data contained therein. In addition, certain of the industry, market and competitive position data contained in this presentation come from the Company’s own internal research and estimates based on the knowledge and experience of the Company’s management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, undue reliance should not be placed on any of the industry, market or competitive position data contained in this Presentation.

Unless otherwise stated, the information contained in this Presentation is provided as at the date of this Presentation and is subject to change without notice. The Company or any of its advisers do not undertake any obligation to update the information provided in the Financial Information or elsewhere in this Presentation, to provide the recipient with any additional information, or to correct any inaccuracies that may become apparent in any information provided.

EU MiFID II/UK MiFIR professionals / ECPs-only – Manufacturer target market (product governance) is eligible counterparties and professional clients only (all distribution channels).

No PRIIPs key information document and no UK PRIIPs key information document will be prepared as not available to retail investors in the European Economic Area or the United Kingdom.

Segments

Energy safety for the region

- Crude oil routes to Gdańsk, Butinge and Trieste provide access to major suppliers from all over the World.
- Refineries connected to crude oil pipelines and alternative sources.
- Oil and gas fields in Poland and Norway serve as a reliable source of hydrocarbons.
- LNG Terminal in Świnoujście with regasification capacity of nearly 8.3 bcm p.a.
- Baltic Pipe with gas transmission capacity of 10 bcm p.a.

In accordance with IFRS 16, capital expenditures include leases and leases* Full consolidation of LOTOS and PGNiG Groups

Main growth projects

Upstream & Supply

- Exploration and production projects in Norway, Poland and Canada

Downstream

- New Chemicals monomers installation in Płock (740 kt/year of ethylene)
- HVO – Hydrotreated Vegetable Oil in Płock (300 kt/year)
- Hydrocracking unit in Mažeikiai (increase in fuel yield by 10 pp)
- Hydrocracking Oil Block in Gdańsk (400 kt/year of base oils group II)
- Rapeseed Oil Pressing Plant in Kętrzyn (200 kt/year of oil for biofuel production)

Energy

- Offshore wind farms on the Baltic Sea: Baltic Power (1,2 GW), Baltic East (0,9 GW)
- Expansion and modernisation of energy and gas distribution networks
- Construction of CCGT units: Ostrołęka (745 MWe), Grudziądz (560 MWe), Grudziądz#2 (560 MWe), Gdańsk (560 MWe)
- Construction of solar farms in Poland and Lithuania

Consumers & Products

- Expansion and modernisation of fuel station network
- Expansion of non-fuel retail network
- Expansion of alternative fuels network (E-mobility)

Outlook for 2026

Business Profile

Strategic Approach

Sustainable Growth

Segments

Investments

- Investment programme execution with budget discipline and project management excellence
- Completion of updated integrated schedules and budget outlays of New Chemicals
- Commissioning of assets: offshore wind farm Baltic Power, CCGT Grudziądz and HVO in Płock

Operations

- Strengthening of operational excellence: resilience and agility
- Secured and diversified sources of hydrocarbons supply
- Focus on maximum assets utilization with planned maintenance shutdowns

Finance

- Refinancing of Revolving Credit Facility of EUR 2,0 bn
- Arranging EUR 2,4 bn Export Credit Agency facility for New Chemicals project
- Market risk management in spotlight

2. Strategic Approach

Based on key trends and future market changes, we have defined fundamental principles guiding our transformation

Business Profile

Strategic Approach

Sustainable Growth

Segments

UPSTREAM & SUPPLY

Gas as a transition fuel during coal phase-out

- **Immediate need to reduce emissions** from the industrial and energy sectors.
- **Diversification** as key to secure natural gas supply.

Securing Polish economy with possibility of up to 27 bcm ¹ p.a. of natural gas by 2035

DOWNSTREAM

Moving towards decarbonising transport

- Increasing pace of electrification combined with continued demand for liquid fuels.
- **EU policies and regulations** aimed at introducing new alternative fuels.
- **CO₂ costs** driving decarbonisation of production assets.

Approximately 26% ² of renewable energy in our fuel mix by 2035

ENERGY

Need for zero-emission energy sources

- Growing energy consumption in the **CEE Region**.
- **Scale up of wind and solar** installed capacity.
- **Improving economics** of BESS.

12.8 GW of RES capacity by 2035 with BESS development
Introduction and deployment of SMR technology

CONSUMERS & PRODUCTS

Customer-centricity

- Need for **affordable and accessible energy** in transport, power generation and heating.
- Rising **consciousness & demand** for clean energy.

Providing a convenient and sustainable offering to 10mm+ customer

¹) Sum of production and contracted gas supplies

²) Includes the effect of multipliers defined by RED III regulations

Our strategy is set on solid foundations and pillars to integrate and streamline our business

A set of ambitious targets fits with our strategic principles and allows us to deliver a responsible transition

ORLEN 2035					
VALUE MAXIMISATION		INNOVATIVE & SUSTAINABLE PORTFOLIO		ASSET OPTIMISATION	CAPITAL STEWARDSHIP
Bringing the cash home		Transforming the future		Derisking the model	Finding the right capital structure
12 bcm	Gas production	12.8 GW	RES installed capacity	Strong ecosystem of partnerships developed across business lines such as: • Renewables • Biofuels • Chemical Feedstocks • CCUS • SMR • Biomethane • Upstream 8-10 % Minimum required hurdle rate	
15 bcm	LNG contracted	0.6 GW	SMR installed capacity		
		+25 % ¹	Share of RES in transport		
4.3 GW	CCGT installed capacity	10 %	Chemical product sales based on circular feedstocks		
10 mm	VITAY ecosystem users	1 TWh	Delivered to EVs		
10-12 %	Minimum required hurdle rate	4 mtpa	CCUS transport and storage capacity	• Optimized international and domestic Upstream & Supply portfolio. • Integrated and transformed Downstream asset base. • Divestments of selected assets. • Maximising operational availability in Refining (>97%). • Introduction of advanced CAPEX Control Program across the group.	
		7-9 %	Minimum required hurdle rate		
CORPORATE GOVERNANCE SUPPORTING INTEGRATED, COHERENT & DIGITAL ORGANISATION				Integrated renewables business organisation	Integrated electricity trading function
ASSETS DECARBONIZATION & ENERGY TRANSITION				Coal phase-out in power generation until 2030	Net zero until 2050

¹) Includes the effect of multipliers defined by RED III regulations

Our integrated business model ensures stable returns, with 5.5% annual EBITDA growth by 2035

- Average annual EBITDA increasing from PLN ~34-36 bn in 2025 to PLN ~53-58 bn in 2035
- Major share of EBITDA will come from Energy segment (36%, RES and Gas PPs) and Upstream (36%, increased extraction in Norway)

We aim to continue investing in new energy sources, gas supply for the energy transition and decarbonisation of the Downstream segment

Investment Expenditure – CAPEX and M&A [PLN bn]

- Illustrative split of potential annual capital expenditure evolution through 2035
- Cumulative capital expenditures, including equity investments, in the years 2025-2035 are currently intended to range from ~PLN 350bn to ~PLN 380bn
- Of which, ~PLN 270bn to ~PLN 290bn is of a flexible nature, allowing ORLEN Group to actively manage its investment budget
- By 2030, ORLEN Group intends to maintain a net debt/EBITDA ratio not exceeding 2.0x
- After 2030, ORLEN Group targets a gradually reducing leverage ratio to a level not exceeding 0.5x by 2035

We implement disciplined approach to CAPEX control with growth and M&A spending to be carefully analysed in terms of economic benefit on a continuous basis

Average annual CAPEX 2025-2035 [PLN bn]

- We put stress on maintenance and regulatory CAPEX spending effectiveness
- Proper and ongoing supervision of growth and M&A CAPEX will allow taking timely decisions on projects alignment with the market and ORLEN's needs

Business Profile

Strategic Approach

Sustainable Growth

Segments

3. Sustainable Growth

The commitment to reduce emissions is a principle across our entire ORLEN ecosystem

We have updated the two decarbonisation targets, extending their pathways to 2035

2030 TARGET » 2035 TARGET » 2050 AIM

Absolute emissions ¹[Scope 1+2]

-13%

-25%

Emissions intensity ²[Scope 1]

-40%

-55%

Net Carbon Intensity (“NCI”) ³
[Scope 1+2+3] (Category 11)

-10%

-15%

Net Zero

for Scope 1, 2 and 3 emissions, in accordance with the Paris Agreement ⁵

Upstream

Downstream

Energy

Consumers & Product

Note: Base year: 2019.

1) Emissions volume in the Upstream and Downstream segments, measured as Mt CO₂e, for Scope 1 and 2 GHG emissions.

2) Carbon intensity in the Energy (Power and Heat) segment, measured as kgCO₂e/MWh, for Scope 1 GHG emissions.

3) Carbon intensity of produced energy products, measured as gCO₂e/MJ, for Scope 1, 2 and category 11 of Scope 3 GHG emissions.

4) Emissions from the production of petrochemicals (non-energy products) are not included in the calculation of NCI.

5) Our ambition to reduce emissions is consistent with the goal of limiting climate warming to 1.5 °C by 2050. The achievement of our long-term targets will depend on the technological progress and the regulatory and legal context.

Those factors may create more or less favourable conditions for the energy transition and accelerate or reduce the pace of our strategy implementation.

By 2035, ORLEN Group is committed to reduce its emissions from Upstream and Downstream by 25%

Reduction of GHG emissions in Upstream and Downstream ¹ [Mt CO₂e]

Note: Base year: 2019.
1) The target applies to absolute Scope 1 and 2 greenhouse gas emissions in Upstream and Downstream.
2) Final leverage figures may change as a result of the selection of more cost-effective decarbonisation options.

Low-carbon energy sources:

- Use of energy from low- and zero emission sources in the Upstream and Downstream facilities.

Energy efficiency:

- Implementation of energy efficiency solutions in refining and petrochemicals assets.

Upstream emission reduction:

- Reduction of methane emissions in upstream operations – Zero routine flaring and near zero methane emissions at operated assets by 2030.

CCUS:

- Deployment of carbon capture, utilization and storage technologies, or, in specific cases, the lever can be replaced by the RFNBO ².

By the end of 2030, we plan to phase out coal-fired electricity generation, while by 2035 we aim to fully abandon coal-fired production of electricity and heat

Coal-fired Power generation in Ostrołęka B ¹ [TWh]

- Power generation
- Heat generation

Coal-fired Combined Heat and Power generation ² [TWh]

¹) Ostrołęka B – power generation in 2031 will take place in only one unit, whose fuel mix will consist of 50% biomass.
²) All generation from units where coal is co-fired with other fuels.

Pure power generation:

- Ostrołęka B is commercial power plant producing exclusively electricity.
- We plan to fully phase out coal in power generation by the end of 2030.

Combined heat and power generation:

- The majority of our coal assets mainly generate heat, and work for district heating in Poland.
- The district heating systems play a crucial social role that we need to consider while planning the energy transition of this particular type of assets.

ORLEN’s energy transition is intended to lead to a reduction in Net Carbon Intensity of up to 15% by 2035

Zero- and low-emissions power generation:

- The expansion of zero- and low-emissions generation technologies, such as renewable energy sources and CCGT units.

Alternative fuel production:

- By expanding our production of biogas, renewable hydrogen, biofuels and synthetic fuels, and by expanding the network of EV charging points, we aim to supply more energy without significantly increasing our emissions.

Carbon Capture & Storage:

- Emissions captured using CCS technologies deployed on assets not owned by the Group (CCS as a service).

Segments

4. Segments

ORLEN: Integrated and resilient business model

- Business Profile
- Strategic Approach
- Sustainable Growth
- Segments

* As per 1Q Financials

The largest supplier of gas for wholesale, SMEs and households in Poland

A well-diversified segment footprint, with no individual segment resulting in >50% of total EBITDA LIFO*

Segments: Upstream & Supply

Prominent gas producer and supplier in Poland

- Business Profile
- Strategic Approach
- Sustainable Growth
- Segments

Value chain

Inputs:

- Gas and crude oil from imports
- Gas and crude oil from own production
- Gas and crude oil from trading

Outputs:

- Production of gas (high-methane, nitrogen)
- Production of crude oil, NGL and condensate
- Geological surveys, geophysical research
- External sales to customers
- Intracompany sales to gas segment
- Crude oil trading

* Maximum contracted volume. Lower volumes may be expected in the first year of operation.

About the segment

- 1.2bn boe of gas and crude oil reserves
- Crude oil and condensate production of 19.2mm boe in 2025
- Natural gas production of 54.3mm boe in 2025
- Own production and supply contracts, possibility of gas transmission to Poland via Baltic Pipe connection
- Significant portion of import volumes based on long term contracts for LNG from:
 - Qatar** – 50% based on crude oil formula + 50% based on gas formula
 - USA** – based on Henry Hub (gas) formula
- Significant increase of LNG supplies in 2025 (maximum capacity used: 81 ships unloaded in LNG terminal in Świnoujście)

Contracted gas imports portfolio evolution [bcm per annum]

Segments: Downstream

Market leader in refining in CEE

- Business Profile
- Strategic Approach
- Sustainable Growth
- Segments**

Value chain

Inputs:

- Crude oil from Saudi Arabia, Norway, USA, Azerbaijan, Kazakhstan and other directions
- Crude oil from own domestic production
- Natural gas
- Heat and power from energy segment CCGT Płock, EC Płock, CCGT Włocławek
- Naphtha (feedstock from refinery used by steam crackers in petchem)

Outputs:

- Production and sales of fuels, g products, petrochemicals and fertilizers
- Intracompany sales of fuels to retail
- Intracompany sales of monomers to polymers production plant (BOP)

About the segment

- Strategic location of refineries with an access to crude oil pipelines, product pipelines and sea terminals
- Petrochemical assets fully integrated with refining
- Max. throughput capacity of 42.6 mt/y: 16.3 mt/y Płock, 10.5 mt/y Gdańsk (70% stake), 10.4 mt/y ORLEN Lietuva, 8.7 mt/y ORLEN Unipetrol
- Płock refinery is one of the most advanced integrated production facilities in CEE
- Diversification of crude oil supplies – no processing of Russian oil
- Long-term contracts secure more than 50% of crude oil throughput in ORLEN Group
- Refining products market share: 60% Poland, 54% Czechia, 87% in the Baltic States
- Strategic regional supplier for chemical industry, 40 petchem products sold in more than 60 countries
- Petchem market shares (by production capacity) between 4% – 17% depending on the petrochemical product

Segments: Energy

Regulated business with growing share of RES and low-emission CCGTs

- Business Profile
- Strategic Approach
- Sustainable Growth
- Segments**

Value chain

Inputs:

- Natural gas
- Coal
- Renewables

Outputs:

- Production and sales of energy
- Production and sales of heat
- Gas and Power distribution network services

About the segment

- Regulated distribution business profiting from WACC x RAB formula
- Modern low-emission CCGTs supported by capacity payments scheme
- Dynamic growth of renewable energy sources ("RES") portfolio (incl. offshore) supported by flexible CCGT units
- System power plant within the segment
- Largest gas distribution network covering majority of Poland
- Power distribution network strategically located in Central and Northern Poland
- Installed capacity: 6.4 GWe (electricity) / 13.8 GWt (heat)

Installed capacity at the end of 2025 – electricity and heat [MW]

Segments: Consumers & Products

Major provider of utilities in Poland and owner of fuel stations network in CEE

- Business Profile
- Strategic Approach
- Sustainable Growth
- Segments**

Value chain

Inputs:

- Gas and electricity from trading
- Fuels from own refinery production
- Import of fuel
- Alternative products (energy, hydrogen, CNG)

Outputs:

- Sales of fuels
- Sales of non-fuels products
- Parcel services
- External sales of gas and electricity to wide range of customers (SMEs, households)

ORLEN Group
Company Overview

About the segment

- Over 7m customers of gas and 3.1m customers of electricity
- Retail gas sales market share in Poland: 85%

FUELS

- ~ 3 500 fuel stations in 7 countries
~ 2 700 fuel stations equipped in non-fuel concept
- Over 1000 alternative fuel stations (660 EV chargers, 71 CNG stations and 3 hydrogen stations)
- Fuel network market share: 35% Poland, 29% Czechia, 9% Austria, 6% Germany, 4% Lithuania, 5% Hungary
- ORLEN aims to create customer centric organization offering integrated ORLEN product portfolio for at least 10 million customers of loyalty programme VITAY

Fuel stations network

Non-fuel locations

Retail sales of gas
